FOR IMMEDIATE RELEASE

MDE SYSTEMS INC. TEAMS WITH BOEING PHANTOM WORKS ON JOINT TACTICAL RADIO SYSTEM ENTERPRISE NETWORK MANAGEMENT CONTRACT

Yonkers, New York, USA – May 14th 2010. MDE Systems Inc., an internationally recognized leader in Joint Tactical Radio Systems (JTRS) and Model Driven Engineering (MDE) technologies, announced today that it has been selected as a key subcontractor to team with prime contractor Boeing Phantom Works in support of the recently awarded contract from the U.S. Navy for the Joint Tactical Radio System (JTRS) Enterprise Network Manager Software in Service Support (JENM SwISS) program (<http://boeing.mediaroom.com/index.php?s=43&item=1168>). MDE Systems Inc. will be assisting Boeing with the software architecture, design, development and support activities.

"We have been working with MDE Systems Inc. for many years and have been very impressed with their work. We look forward to combining their cutting edge software techniques in Model Driven Engineering, Software Defined Radios and Agile Software Development with Boeing's state-of-the-art network management expertise," said Deborah Wilson, Director of Advanced Enterprise Networks at Boeing.

"We have been aware of the great research that Boeing Phantom Works has been doing over the years and are excited to team with them in evolving and supporting the JTRS Enterprise Network Manager," said Bruce Trask, CEO of MDE Systems Inc.

###

About MDE Systems Inc.

MDE Systems Inc. develops, markets and supports a wide range products, services and training for complex distributed real-time and embedded software systems. Its specialties include Model Driven Engineering, Domain Specific Languages and Software Define Radio technologies. Members of MDE Systems' staff have been working with JTRS/SCA Systems since the inception of the JTRS program and with advanced communications systems well before that. They have worked in lead technical capacities within many large and small companies alike. Members of MDE Systems' technical staff have been writing JTRS/SDR software as part of their full time job for over a decade. They have been involved with all aspects of the evolution of the SCA and JTRS programs from the evolution of the specification to the fielding of some of the first JTRS SCA radios. MDE Systems Inc. is located in the United States. All of its employees are United States citizens. More information can be found at the MDE Systems website: <http://www.mdesystems.com>.
